

Abstract

A card reorienting mechanism and an input hopper of plastic card processing equipment, for example a desktop plastic card printer. The card reorienting mechanism is a modular unit that permits the entire mechanism to be inserted or
5 removed as a single unit from the printer. In addition, the input hopper is designed as an interchangeable system that permits alteration in the card capacity of the hopper.

CERTIFICATE UNDER 37 CFR 1.10:

"Express Mail" mailing label number: EV 036303811 US
Date of Deposit: November 17, 2003
